

# AWARD HISTORY

For over 30 years, GroupGSA's work has been acknowledged with design awards from the profession and the industry. We consider awards not as a goal but as a testimonial that our projects reflect the clients vision from form, function, operation and long term sustainability, flexibility and durability.

Our design focus and drivers challenge the brief to deliver the best possible building outcome achievable within the agreed budget. Our design process is underpinned by a rigorous research and development program to ensure each building embodies the latest thinking, technology and sustainable design principles.
